**WHO BUILDS & MAINTAINS NYC
INFRASTRUCTURE? WE DO.**

Hellman Electric Corporation is helping to make New York's highways, airports and mass transportation, smarter and safer, saving time and energy for millions of New Yorkers. Hellman Electric combines time-tested techniques with leading edge technology to deliver superior results for New York's infrastructure clients. To date, Hellman Electric has been contracted to perform more than \$350 million in ITS projects.

**HELLMAN LIGHTS THE WAY FOR
JET BLUE TERMINAL AT JFK**

The Jet Blue terminal at JFK airport is a little brighter thanks to the efforts of Hellman Electric and Scalamandre Construction. The duo constructed airside and landside improvements at the new terminal comprised of high mast light towers, underground low-voltage and 5KV distribution systems. They also completed an elevated roadway ramp and installed electrical lighting in front of the Jet Blue terminal consisting of 32 light poles and 4,000 feet of conduit and wire.
